SuperKids ABA Social Skills Program - School age

SuperKids is an afterschool ABA program focused on behavior skills training and social cognition skills in learners ages 6 through 11 with clients being grouped by language level and age range. This program provides individual and group based opportunities for participants. Clients can also participate in ABA cognitive skill building programs with an added SuperKids component. School age clients meet at designated times in center.

YMCA site based Partnership

SuperKids ABA Social Skills Program - Teens

SuperKids is an afterschool ABA program focused on behavior skills training and social cognition skills in learners two groups. Ages 12-14 and ages 15 through 17. This program provides individual and group based opportunities for participants. SuperKids is offered twice weekly and can be offered as a standalone program or a component of a Homebased ABA program.

Speech and Occupational Therapy Programs

Speech and Occupational Therapy programs are provided 1:1 in a six week cycle. Clients meet with these specialists two to three times weekly. After goal achievement, program is then added as a consult to the ABA Therapy team. Parent Training in communication - AAC technology, etc. is added.

Focus: Apraxia, Feeding, AAC (technology), fine motor and visual processing difficulty, challenges with coordination
